

The Ultimate Sound Experience™

# Professional Cinema Loudspeaker Systems

# The best performers

Once movie-goers experience the unbridled dynamics and intense realism of a Klipsch Cinema and Stage System, they will have a new favorite theater for life. Audiences have never heard dialogue so precise or soundtracks so stunningly detailed and immersive. Only Klipsch delivers such an impressive line of speakers for discriminating theater operators.

## are behind the screen.

American-made for over 60 years, Klipsch cinema speakers offer years of reliable and trouble-free performance. From the grandest auditoriums to the coziest cinemas, our technical experts will ensure that your customers have the richest auditory experience possible.

Discover the passion of Klipsch.

**THX****THX**

## Behind-the-Screen Systems

### KPT-MCM-4-T Grand

The first and only fully horn-loaded, THX®-Approved four-way cinema system, the KPT-MCM-4-T Grand affords the ultimate in audio performance for larger exhibition spaces and, in particular, those grand auditoriums fitted with digital sound reproduction equipment. The low-frequency punch is provided by a KPT-MWM dual, 15-inch, high efficiency, horn-loaded woofer enclosure, aided by a separate, single, 12-inch, Tractrix® Horn-loaded mid-bass device, the KPT-XII. High frequencies are effortlessly reproduced by the KPT-402-MF Tractrix Horn and Klipsch K-1133 two-inch exit titanium compression driver. The high output, extended high-frequency horn module, the KPT-Grand-HF-T, provides extra sizzle in more majestic-sized theaters. The MCM Grand is ultra-efficient and, in correct multi-channel configuration, can yield absolutely even sound coverage to every seat in the house.

### KPT-745-Q

Following the success of the KPT-MCM-4-T Grand fully horn-loaded, four-way cinema system, Klipsch designed the new, four-way KPT-745-Q to deliver similar movie chills and thrills but from a much shallower cabinet. Less than 24 inches in depth, the KPT-745-Q system is perfect for larger theater venues with limited space behind the screen. The low-frequency punch is provided by the high efficiency KPT-415-LF quad 15-inch bass unit, aided by a separate, single 12-inch, Tractrix Horn-loaded mid-bass device, the KPT-XII-MB. The KPT-402-MF Tractrix Horn and K-1133 two-inch exit titanium compression driver effortlessly reproduce the system's mid frequencies. For the added kick that's required by grandiose locations, the KPT-Grand-HF-T extended high-frequency horn module easily handles the system's smooth treble reproduction. This powerful system is also available with a mid/high passive crossover for a tri-amp configuration and referred to as the KPT-745-N.

### KPT-445-N

Klipsch designed the new, four-way KPT-445 N to deliver the digital soundtracks found on today's latest films for the small to medium sized auditoriums. This system is designed to be used in a tri-amp configuration. It utilizes the KPT-904 LF double 15" low-frequency system, working in conjunction with the KPT-402 MF. The high frequency section utilizes the proven KPT-904 HF section while the Ultra High Frequency section counts on the K-703 horn and a 1.75" titanium diaphragm to deliver the sizzle to every seat in the house. The combination of High Frequency Tractrix horn and the Ultra High Frequency Tractrix horn is labeled the KPT-445 UHF/HF N.

### KPT-Jubilee® 535

With auditorium space at a premium, the Jubilee low-frequency device, with its 24-inch depth, is the ultimate space-saving solution. Developed by audio pioneer Paul W. Klipsch in 2001, this dual 12-inch loudspeaker system couples the horn-loaded woofers with the KPT-402-MF mid-bass Tractrix Horn coupled to the Klipsch K-1133 two-inch exit titanium compression driver. The high frequencies are easily handled by the KPT-Grand-HF-T Tractrix Horn.

### KPT-535-4-T

This THX-Certified system is an enhanced version of the KPT-535-T, with a KPT-415-LF quad 15-inch direct-radiating bass unit for greater output in large auditoriums. Yet it retains the smaller system's 24-inch depth, minimizing the valuable theater space consumed by the area behind the screen. The dialogue range is superbly handled by a KPT-402-MF Tractrix Horn fronting a K-1133 two-inch exit titanium compression driver. And, a KPT-Grand-HF-T Tractrix Horn ensures smooth, effortless treble reproduction. This system is also available with a mid/high passive crossover for a bi-amp configuration and is known as the KPT-535-4-N.

### KPT-535-T

THX-Approved, the KPT-535-T, with its 24-inch depth, allows for more real estate where it matters—in the auditorium. Embracing the concept of a three-way, direct radiated bass system in a behind-the-screen application, the KPT-535-T utilizes the KPT-904-LF double, 15-inch low-frequency system. Reproducing the critical dialogue range is the KPT-402-MF mid-bass Tractrix Horn coupled to the Klipsch K-1133 two-inch exit titanium compression driver. The high frequencies are easily handled by the KPT-Grand-HF-T Tractrix Horn. This system is also available with a mid/high passive crossover for a bi-amp configuration and is known as the KPT-535-N.

## KPT-435-N

As the first complete three-way passive behind-the-screen system on the market, the KPT-435-N affords the ultimate in audio performance for small-and medium-sized venues. Less than 20 inches in depth, it is also one of the most space saving speakers in its performance category. Based on the proven KPT-904-LF dual 15-inch bass unit, the KPT-435-N delivers powerful bass from a shallow cabinet that is just 17.75 inches deep. In order to reproduce the critical dialogue range, this system also features the new KPT-335 HF/MF-N, which consists of a K-510 Tractrix Horn, two-inch throated compression driver and the K-703 horn with a 1.75-inch titanium diaphragm. It is perfect for exhibitors who want to utilize a fully passive or bi-amplified three-way system in their auditoriums.

## KPT-335-N

Unlike many three-way behind-the-screen systems, the KPT-335-N is 12.25 inches in depth, making it one of the most compact performers in its class. Engineered to save space and deliver superior sound to smaller-sized venues, the KPT-335-N serves as a high-output single 15-inch three-way system. It features the KPT-315-LF for enhanced bass output and the same KPT-335 HF/MF-N configuration as the larger KPT-435-N for improved speech intelligibility. This system also utilizes a fully passive or bi-amplified, three-way network.

## KPT-942-4-T

The THX-Certified KPT-942-4-T two-way screen and stage loudspeaker system is based on the KPT-415-LF quad 15-inch bass unit, providing enhanced bass output while retaining the 24-inch depth of smaller systems. Higher frequencies are handled by a KPT-402-HF Tractrix Horn with a K-1132 two-inch exit titanium compression driver. The KPT-942-4-T's high efficiency, very high output and excellent coverage characteristics make it an outstanding, cost-effective solution for medium and large auditoriums.

## KPT-942-T

The KPT-942-T is a THX-Certified high-performance two-way screen and stage loudspeaker system well suited for medium-sized auditoriums. Based on the proven KPT-904-LF dual 15-inch bass unit, it delivers powerful bass from a cabinet just 24 inches deep. For high output combined with excellent coverage, the system uses a KPT-402-HF Tractrix Horn with a K-1132 two-inch exit titanium compression driver to reproduce mid and high frequencies.

## KPT-904

A mid-sized screen and stage loudspeaker system, the KPT-904 is especially suited for stadium seating. An advanced technology Tractrix Horn, the KPT-904-HF, is mated to a 2-inch exit titanium compression driver and, together with the KPT-904-LF dual, 15-inch, low-frequency cabinet, delivers sensational performance and accurate coverage control, all at a remarkable price. This system is also available with a passive network and is known as the KPT-904-N.

## KPT-325

Engineered to save space, the KPT-325 is only 12 inches in depth. The system features the KPT-315-LF single, 15-inch woofer enclosure coupled with the KPT-904-HF Tractrix Horn. Amazingly, this compact combination delivers the same frequency response as the KPT-904 system. This system is also available with a passive network and is known as the KPT-325-N.

## Surrounds

### KPT-250

A 12-inch, three-way cinema surround loudspeaker system, the KPT-250 offers high power handling, extreme efficiency and extended bass response. Its 90° by 60° coverage pattern makes this the ultimate side surround speaker for larger auditoriums as well as for the surround EX channel. The system features Tractrix Horn technology, a 15° down-firing angle, a .75-inch void-free plywood enclosure pre-drilled for industry standard mounting brackets and a high-frequency protection circuit.

### KPT-1201

The KPT-1201 is a THX-Certified cinema surround speaker system that delivers extended bass response, controlled coverage and standard SMPTE/ISO 2696 X-curve de-emphasis from an enclosure designed not to appear bulky. Its 12-inch woofer and 1.75-inch titanium high-frequency compression driver coupled to a 100° x 100° Tractrix Horn accurately reproduce the enormous dynamic range demanded by digital sound formats. A protection circuit guards the tweeter from potentially damaging signal levels. The enclosure angles the drivers downward at a 15° angle and is pre-drilled for industry-standard mounting brackets.

### KPT-8001

THX-Certified, this two-way cinema surround loudspeaker system offers high efficiency, controlled coverage and standard SMPTE/ISO 2696 X-curve de-emphasis. It features a single high-output, eight-inch woofer and a high-frequency compression driver coupled to a 100° x 100° Tractrix Horn. The shallow enclosure angles the drivers downward at a 15° angle and is pre-drilled for industry-standard mounting brackets. The system also incorporates a high-frequency protection circuit to safeguard the tweeter.

### CA-800-T

The CA-800-T compact full-range system works well in professional cinema surround applications where flexible mounting and extended range are required. It includes a high-power eight-inch extended low-frequency driver and a titanium diaphragm compression driver mated to a 90° x 90° Tractrix Horn. This dual port bass-reflex loudspeaker can also handle 100 watts of continuous power for an AES sensitivity of 96dB. The CA-800-T ships complete with a mounting bracket.

## Subwoofers

### KPT-884

Capable of delivering an earth-shaking low frequency of 18Hz, the KPT-884 is a high-output, bass-reflex cinema subwoofer that features an advanced low-frequency four-inch voice coil driver design. Less than 23 inches in depth, this system utilizes a single 18-inch driver that gains its high efficiency through the use of large, geometrically optimized structures and lightweight cones.

### KPT-684

THX-Approved, the KPT-684 is a high quality subwoofer system that features an advanced low-frequency driver design inside a bass-reflex enclosure for smooth response to the lowest audible frequencies. The system utilizes two 18-inch drivers that gain their amazing 105dB sensitivity through the use of large, geometrically optimized magnet structures and lightweight cones.

### KPT-418

Less than 11 inches in depth, the KPT-418 cinema subwoofer is even more compact than the KPT-884. This high-output, bass-reflex subwoofer system delivers true low-frequency performance along with high power handling capability and high efficiency. It can be used as the main subwoofer system in a small auditorium or as the subwoofer for surrounds in small-to medium-sized auditoriums.
